- Largest supplier of Promotional Gifts in Middle East since 1989.
- Established company with excellent track record for Best Customer Service.
- Large collection of products to choose from.
- Item Ready in Stock with Large Quantities available.
- Different Branding option to choose from.
- All branding is done in-house with fast delivery.
- Large production facility
- Competitive Prices.

# Our Services

Below are list of Services we offer.

Almost every product in this catalogue can be branded. Selecting the correct branding method is needed to ensure maximum exposure of your logo.

---

## SCREEN PRINTING

Screen Printing is the process whereby a logo is exposed into a mesh screen. Ink is then placed onto the screen and squeegee pushes the ink through the screen in the areas where the logo has been imposed.

## DIGITAL PRINTING

A method of printing from a digital-based image directly to a variety of media. It usually refers to professional printing where small-run jobs from desktop publishing and other digital sources are printed using small/large-format and/or high-volume laser or inkjet printers.

## PAD PRINTING

Pad Printing is an offset printing process that involves ink being transferred from an engraved metal plate onto a product via a Pad, creating an image on the product.

## UV PRINTING

UV Printing is a form of digital printing that uses Ultra-violet lights to dry or cure the ink as it is printed. The printing method is best for branding that involves gradation effect and articles that need edge to edge printing.

## HEAT TRANSFER PRINTING

A digital image is printed onto a special vinyl surface, which is then placed into the product. The product is then placed in a heat press machine, where heat will merge the vinyl and the product.

## 3D Engraving

3D Laser engraving, which is a subset of laser marking, is the practice of using lasers to engrave letters, logo or even images could be scaled to size and reproduced with exactly defined strokes.

## SUBLIMATION PRINTING

Sublimation Printing is a process done by way of full-colour printer which is fitted with special sublimation inks. The logo is printed onto a special transfer paper, then placed into the product where heat is applied causing the inks to migrate from paper to product.

## DEBOSSING

Debossing is the opposite of embossing as you are creating an indent in the material you are using. A metal die is stamped onto the front of the material you are using causing depressions that leave a imprint of the image on your products.

## DEBOSSING WITH FOILING

Debossing imprint with additional foiling effect for branding to obtain more impact. Available in different colours.

## LASER CUTTING & ENGRAVING

Sheet of polymethyl methacrylate or PMMA ( also known as acrylic ) have been used to replace less-durable materials like glass in many different ways. Laser can cut through some pretty powerful stuff, even materials as hard as aluminium sheets, plastics and acrylic sheets.

## METAL MARKINGS

A logo is etched into a product with a laser beam, replicating the logo with precise accuracy.  
The laser "burns" the top layer of the product off and reveals the layer beneath.

## DOMING EPOXY

Doming is used to create a version of your logo by shaping a raised surface beneath the print.  
A mould is formed, printed and filled with epoxy which then is hardened to maintain its shape.

## ROUND HEAT TRANSFER PRINTING

A digital image is transferred into a round circular object using a special rotating press.

# WIRELESS CHARGING

TAKE YOUR  
BRANDING  
& CHARGING  
TO THE NEXT LEVEL

## What is it?

Wireless charging or charging by induction is transferring power without the use of wired connection. Instead, this technology transmits power from one device to another with the use of electromagnetic fields. This is a more efficient and practical way of charging all sorts of device with wireless capability.

 10,000 mAh

CODE : JU-WPB-10000

Wireless Powerbank

Input : DC 5V / 2.1 A • USB Output : DC 5V / 2.1 A  
Wireless Output : DC 5V / 1.0 A  
Wireless Receiving : DC 5V / 750 mA  
Dimensions : 135 x 75 x 18 mm

Wireless charger for smartphones under the Qi-Standard.  
Easy to charge your phone without cables.  
Just put your phone on the top of the charging pad.

CODE : JU-WCP-1

Wireless Charger

Input : DC 5V / 2.1 A  
Wireless Output : DC 5V / 1.0 A  
Compatible with Qi-Standards  
Dimensions : 90 x 90 x 8 mm

## Wireless Powerbank Wallet with Phone Holder

Promote your Brand on our Smart & Portable Promotional Wallet

CODE : **JU-WPB-4000**

*We are committed*

**to be your most reliable source of USB Flash Drive in the Middle East.**

USB flash drives make an impressive & practical corporate gift while promoting your brand at the same time.

We specialize in importing quality USB Flash Drives for promotional purposes. Our USB Flash Drives are sourced from reputable factories using quality components such as Samsung or Toshiba and carry a warranty against defects. We pride ourselves on high standard levels and after sales services to ensure your peace of mind when dealing with us.

If you can't find your favorite USB in this catalogue or you need to customize a USB we can source it for you.

#### **Reasons why you choose us as your USB Flash Drive source.**

- We import original chips separately and after testing & quality checking, we fix them in USB shells.
- We never import duplicate or upgrade chips and we offer flashes with one year warranty.
- Fast delivery from ready stock.
- Big variety and range of products to select.
- Competitive prices with higher quality.
- Mock Ups and E-Samples:

If you can't find your favorite USB in this catalogue or you need to customize a USB we can source it for you.

We have our own in-house design facilities so we can provide you with Mock-Ups or E-virtual samples of exactly how your printed USB flash drive will look after final production. We offer our USB flash drives with the latest techniques in printing such as :

- Full Color UV Printing
- Screen Printing
- Laser Engraving
- Laser Marking
- Full Color Digital Printing & Epoxy

#### **What are upgraded chips?**

Unfortunately some manufacturers use a lower capacity memory and sell as a higher capacity memory.

#### **How they do it.**

1. They use a software to upgrade 1 GB to 4GB. When using the chip in your computer it shows 4GB but can't accept files more than 1 GB because the real capacity is 1 GB.
2. They use 4 pcs of 1 GB chip instead of 1 piece 4 GB memory. When you save a file more than 1 GB it will show an error and if you save a file less than 1 GB it will be saved but when you need to reopen the file, as it is not clear in which one of the chips is saved. again it will show an error.

**We never use upgrade chips, We use only original chips.**

## Promotional USB Flash Drives

Our world is currently connected through technology. USB Flash drives is one of the most common technology used by an individual. Therefore, its a great way to promote your Logo.

CODE : **USB-16**

## OTG Technology On-The-Go!

Data transfer between platforms without inconvenient cables.

USB OTG products can easily communicate with each other without the need of a personal computer. For instance, you can directly connect a digital camera to a mobile phone, as long as the device is both OTG-compatible.

Instruments

MADE IN ITALY

PRODUCTION IN ITALIA

FABRIQUE EN ITALIE

FABRICADO EN ITALIA

# maxema®

solo una penna?  
*Maxema, just a pen?*

## ***Planning***

---

Not everyone knows that it can take more than a year to create a new pen in which every detail is handled with meticulous care. Creating the moulds for each component of the pen is a highly complex operation: a mistake of even a hundredth of a millimetre could jeopardise its operation. This is why all our pens are designed and manufactured entirely in our only Italian premises, where we are able to monitor every stage: from the first prototypes right down to marketing the finished product.

## ***Sustainability***

---

Only a quality pen can really enhance a message, growing a brand's visibility and, why not, helping to limit the pollution of the planet. Plastics pollute: if a pen is high quality it will have a long average lifespan that will lead it to change hands more than once, so limiting the waste that comes from the immediate discarding of faulty pens. It is much better to invest in quality pens, maybe choosing to limit the quantity rather than running the risk of compromising your image and spreading the irresponsible use of plastic pens. The longer a pen's life is, the less it pollutes the environment.

## ***Responsibility***

---

The certificate of origin for our pens also guarantees that no child labour is involved in their manufacture, nor working conditions that do not respect workers' basic rights. We demand the same guarantee from our Italian and German raw materials suppliers. Even a pen can help to spread the culture and respect of the dignity of workers.

## ***Design***

---

The design of our pens is the outcome of ongoing styling research: the lines and colours are inspired by the trends of the day. A promotional pen must attract and excite, as well as being a quality support for the message it is delegated to convey. Appearance, originality, quality: everything must be perfectly balanced to make a pen worthy to carry a uniquely special company image.

## ***Customisation***

---

Once assembled, the pen is ready to be "dressed" with a logo or a message: our graphics office works on digital simulations to assess the possible alternatives, suggesting new proposals so that the most suitable combination can be found. Like a tailor's shop, the customer can try different sizes, colours and positions until the suit adapts perfectly to his needs. Only then does the pad or silk-screen printing stage begin, using highly resistant paints, after which the pen is finally ready to travel the world with its precious message: your image

## ***Quality***

---

Attention to quality starts with the strict selection of raw materials: the plastic, refills and inner springs come exclusively from Italian or German suppliers, who guarantee their quality and reliability. The plastic for our pens comes from top quality, non-toxic ABS, which is highly resistant to knocks and sudden changes in temperature, guaranteeing excellent glossiness and high colour stability. The refills respect EU Directives for hazardous substances (2004/73/EC, 67/548/EEC and 2006/1907/EC-REACH) and the American TSCA (Toxic Substances Control Act): so all the inks are non-toxic.

## ***Production***

---

Our highly automated assembly lines guarantee rapid, extremely competitive manufacturing times: depending on the model, our machinery can assemble from 2,000 to 6,000 pcs per hour. Automation also means guaranteeing functionality: strict quality checks make sure that all our pens operate perfectly at each stage of their assembly.

***Precision design, meticulous engineering, constant research and testing, selection of the best materials.***

***In short:***

***a love for beautiful objects and care for the environment.***

***This is what an Italian-made product means for Maxema.***

## “A significant step forward toward the use of safe plastic.”

### Nature friendly

Made of non-toxic plastics, it has been designed to have a long life and to minimise the risk of harmful substances being released into the environment. Using a pen for as long as possible helps to reduce pollution and enables us to give full expression to the concept of promotion.

### Green chemical

It does not contain dioxin, phthalates, bisphenol A, antimony, arsenic, barium, cadmium, chrome, mercury, lead, polybrominated biphenyls (PBBs), polybrominated diphenyl ethers (PBDEs) or deca-BDE, and conforms to RoHS and REACH directives.

### Looking to the future

Made of plastic suitable for toy manufacture (according to European standard EN 71-03 and U.S. FDA regulations).

### Antibacterial

It is made of antibacterial plastic containing a special additive which releases silver ions that prevent bacteria from colonising the surface of the pen.

### Really safe

The plastics employed are compliant European & American FDA food contact regulations.

### CLP compliant

It is rated as non hazardous the Regulation on Classification, Labelling and Packaging.
